Applicant's or agent's file reference PC 05 022 M	IMPORTANT NOTIFICATION
International application No. PCT/EP2005/001547	International filing date (day/month/year) 16 February 2005 (16.02.2005)
Applicant BRÜD	DER NEUM <b>E</b> ISTER GMBH et al

To:

1.	Transmittal	of t	the	translation	Lo	the applicant.
	TIMMUMINUM	V1 1		n minararium	w	mic appucativ.

The International Bureau transmits herewith a copy of the English translation of the international preliminary report of
patentability (Chapter I).

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

### 2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

1

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

SM, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

### 3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

Ba	nx No. 1 Busis of this opinion
Ī	With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language  . which is the language of a translation furnished for the purposes of international search (under
ŀ	Rule (2.3 and 23.1(b)).
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
	a. type of material
ĺ	a sequence listing
}	table(s) related to the sequence listing
	b. formut of material
1	
	in written format
	in computer readable form
	e. time of filing/furnishing
1	contained in the international application as filed.
	filed together with the international application in computer readable form.
	turnished subsequently to this Authority for the purposes of search.
3.	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filled or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filled or does not go beyond the application as filled, as appropriate, were furnished.

Box No. V		Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability: citations and explanations supporting such statement					
1.	Statemen						
	Nove	Ity (N)	Claims	YES			
			Claims				
	Inven	tive step (IS)	Claims	YES			
			Claims				
	Indua	trial applicability	IA) Claims	VES			
			Claims				
		<del></del>					
2.		and explanations					
	1.		ce is made to the following documents:				
			?-A-0864422/				
			E-A-3736629 /	,			
		D3: X	P008014435 "How to Calibrate and Linearize	an			
		I	magesetter Using the Digital UGRA/FOGRA Wed	dge /			
		D4: E	P-A-0825022/				
		D5: U	S-A-4665824 /				
	2.	The pre	sent application does not meet the				
		require	ments of PCT Article 33(1) because the				
		subject	matter of claims 1, 4, 6-8, 10, 12, 14, 20	ο,			
		22, 23	and 27 is not novel within the meaning of I	CI			
		Article	33(2).				
	2.1	Documen	D1 discloses (see the references in the	•			
		search	report) an apparatus for determination of t	he			
i		quality	of the imaging of printing plates by means	5			
		of an o	otoelectronic measured-value transmitter				
		(densit	ometer 400) for detection of a measurement				
			edge 700) which is arranged outside the				
			nt mirror and has different measurement				
			and having an evaluation device (1120) for	<u>-</u>			

evaluation of the measured values determined by the

International application No.
PCT/EP2005/001547

Box No. V Reasoned statement under Rule 43bis. I(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such stotement

measured-value transmitter, with the measured-value transmitter being designed to detect two measurement marks which are arranged on the printing plate (see column 18, lines 52-57), with the measurement marks each having a measurement field combination comprising at least one tone-value measurement field and at least one structured measurement field (microlines 760).

Although the measured-value transmitter detects only the tone-value measurement fields in document D1, while the structured measurement fields are observed visually by the operator, D1 nevertheless anticipates the subject matter of claim 1 because, although the wording of claim 1 requires the detection of the measurement mark, it is not necessarily dependent on the detection of all of its components. Furthermore, it should be noted that a densitometer is always able to detect a measurement field comprising microlines, in the course of its densitometric capabilities.

For the above reasons, document D1 also anticipates the method according to claim 14.

The measurement mark according to claim 20 is likewise not novel in comparison to D1.

A printing plate according to claim 27 can be found in figure 9 in D1.

The disclosure in document D1 also anticipates the features of dependent claims 4, 6-8, 10, 12, 22 and 23.

2.2 Document D2 discloses an apparatus for determination

International application No.
PCT/EP2005/001547

Box No. V Reasoned statement under Rule 43bls. I(a)(i) with regard to novelty, inventive step or industrial applicability: citations and explanations supporting such statement

of the surface coverage of a printing plate, which can also be used for determination of its quality, having a measured-value transmitter (sensor 8) and, implicitly, an evaluation device, with the sensor detecting the surface coverage of various measurement fields, which may also include structured fields.

In consequence, document D2 anticipates the subject matter of claim 1.

- 2.3 Documents D3 and D4 likewise disclose the features of claims 20, 22 and 23.
- 3. Dependent claims 2, 3, 5, 9, 11, 13, 15-19, 21 and 24-26 do not contain any features which, in combination with the features of any claim to which they refer, meet the PCT requirements for inventive step (PCT Article 33(3)) since they are obvious from documents D1 and D5, or from expert knowledge.
